

Roll Bar Installation Guide

⚠ ⚠ ⚠ Please be sure to install in order, first install the plastic part, and then install the bracket

First Part--Install the Pipe

1. When the screw throw the hole, you don't need so tighten it so tightly, make sure it can install the **plastic part** and **bracket**, you can tighten the pipe when you install the plastic part.

Second Part-Installation of plastic parts

1. Find the plastic part first, and put it together (Like the picture)

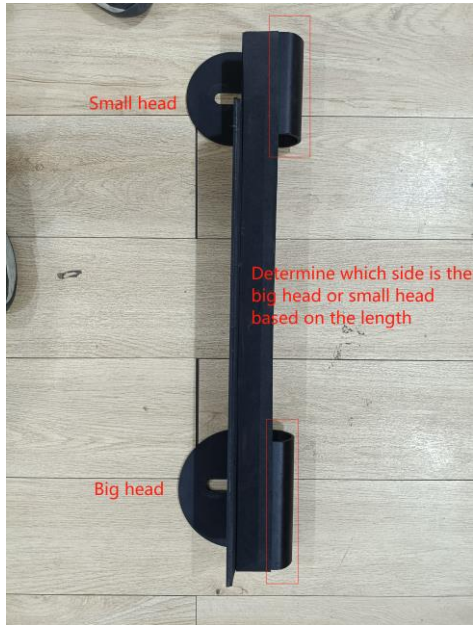

2. Put the screws we have prepared onto the corresponding holes

3. Finish

Third Part—Installation of bracket base

1. Find the bracket.

2. Find the big head/small head, determine which side is the big head or small head based on the length, Check the picture.

3. Then put the bracket on the roll bar, then find the bolts and install it

Finish.
